

■ Frontend + Tailwind CSS Weekly Roadmap

Month 1 → Basics (HTML, CSS, Tailwind)

Week 1:

- Learn HTML5 (tags, headings, forms, lists, tables)
- Practice making a simple portfolio skeleton (just raw HTML)

Week 2:

- CSS basics (box model, padding, margin, display, flex, grid)
- Make 3 layouts: Card layout, Image gallery, Blog page

Week 3:

- Install Tailwind CSS (CDN or config)
- Learn Tailwind utilities (colors, spacing, font, flex, grid)
- Make Button Playground + Card Gallery using Tailwind

Week 4:

- Build Forms UI (login/signup)
- Make Hero Section with background image
- Learn hover, focus, active, ring, outline

Month 2 → Intermediate (Responsive + Components)

Week 5:

- Responsive design (sm, md, lg, xl)
- Build Responsive Navbar with hamburger menu

Week 6:

- Pricing Section (3–4 cards)
- Testimonial Section with avatars

Week 7:

- Portfolio Gallery (images, hover effects)
- Blog layout with multiple posts

Week 8:

- Mini-project: Landing Page (hero, features, testimonials, footer)

Month 3 → Advanced (React + Tailwind)

Week 9:

- Start JavaScript basics (variables, arrays, functions, DOM)
- Practice with simple Tailwind + JS interactions (toggle dark mode, modal)

Week 10:

- Learn React basics (components, props, state, events)
- Recreate previous projects in React + Tailwind

Week 11:

- Routing (React Router)
- Build multi-page portfolio site

Week 12:

- Advanced Tailwind (dark mode, animations, transitions)
- Mini-project: Dashboard UI with sidebar & cards

Month 4 → Expert (Real-World Projects)

Week 13:

- Blog App (React + Tailwind, with dummy data)
- Learn fetching data with fetch/axios

Week 14:

- E-commerce Product Page
- Add cart UI (JS state)

Week 15:

- SaaS Website Clone (Stripe/Notion style)
- Practice animations (framer-motion + Tailwind)

Week 16:

- Final Project: Complete Portfolio (about, skills, projects, contact)
- Deploy to Vercel/Netlify
